

Client: A Mid Western State Department of Education

This Mid Western State Department of Education, sensed a need some time in 2001 to tie up with a few reliable companies to take help for their software development projects. After a detailed evaluation process

(based on an open RFP) where they reviewed several proposals and selected Digitek as one of the trusted partner to handle their staff augmentation needs for software development and maintenance projects on various platforms. This partnership has been established for an initial period of five years and and is renewable thereafter.

Digitek has helped the client on the following Projects:

Project: Community Schools Payment Process System (CSPS)

The client has a Community Schools Payment Process application based on Legacy System that has the main objective to handle payment and related processes for all the employees. To incorporate changing business needs, the client wanted enhancements and modification to this old legacy system. Digitek resource helped them to evaluate the current system and based on the evaluation, various enhancements have been implemented.

Technology Platform: COBOL, Alpha Open VMS

Project: Oracle Financials 11.0.3 Implementation and Upgrade to 11i

The client needed to convert the old Legacy Accounting System to a more user-friendly and enhanced Oracle based Accounting System. The overall project computerized business processes such as Grants Management, Project Accounting, Budgeting, Payables, Receivables, Human Resource and Time Management, General Ledger. Digitek resources have performed installation of Oracle Apps version 11.0.3 and are currently engaged in the upgrade process to Oracle Apps 11i from the current version.

Technology Platform: Oracle Financials 11.0.3, 11i (11.5.7), Windows 2000 Advance Server, Windows NT, Oracle Enterprise Manager (OEM)

Project : Database Design and Optimization

The client has several MS SQL server databases. Digitek is helping them for designing, optimization and maintenance of these databases. Some of the stored Procedures were taking close to 90 minutes to complete all the processes. As these processes have now been optimized by Digitek team, it takes less than five minutes for them to complete.

Technology Platform: SQL Server 7.0/2000 on Windows NT 4.0 and Windows 2000, IIS, Crystal Enterprise Servers, Brio Enterprise Servers and Business Objects Servers/ Compaq Servers.
