

GUJARAT MARITIME BOARD

To make ports of Gujarat as 'International Port of Choice' GMB with the help of Digitek built a dynamic and comprehensive web portal
...www.gmbports.org

Gujarat Maritime Board (GMB) is the first autonomous state board established in 1982. It is the only maritime body which has an enviable feat, both nationally and internationally in cargo handling and ship breaking activity. The port is recognized as one of the prime catalysts to accelerate and enhance the industrialization process of the state.

GMB ports want to have a fully computerised system with 100 percent automation and cargo handling and with each port acting as a profit centre

Digitek was entrusted with the task of developing a web portal for GMB Ports in order to help them achieve the goals and milestones that they had set for themselves.

Through this portal GMB ports want to promote the board and its activities, broaden the market place, and facilitate easy and quick access of information to its existing and potential customers. All the latest updates are published periodically with the help of the administrative module.

The challenge faced by Digitek was to design the comprehensive web portal, publish static and dynamic contents as well as provide interface to administrative section to upload latest information. The higher level sitemap was designed to broadcast the organizational information section, nature of the port, current ships and expected ships, captive jetties, policies & strategies of the board and its mission, goals and achievements. Section to publish the traffic statistics and statistics from accounting section is also provided in this portal.

The other sections highlighted are disaster management section, commercial section etc... Provision to download tender forms is also provided.

The portal facilitates text-based information retrieval and access, feedback, contact information, site maps, news and official links.

The www.gmbports.org is a complete & comprehensive web portal with static and dynamic modules designed, developed, maintained and hosted by Digitek.

Let's get *IT* on.

Technology Platform :

HTML, Dreamweaver 5.0, Photoshop 5.5, ASP 2.0,
MS-Access, JavaScript, VB Script
