

Client: Mid-Western State Department of Mental Health

Digitek team is helping Department of Mental Health for the rewrite of the hospital/ inpatient billing and reimbursement system. The current legacy system is a mainframe, IMS, DB2 based system. Legacy on-line applications sit on a CICS platform and batch systems are COBOL.

Digitek team is helping the State Agency leadership on an initiative to re-engineer the legacy business system and architect, build and implement a web based/distributed billing system. The web interface of this initiative is currently in development and is a Websphere/J2EE development platform. Approximately 50-60% of the project is batch and will interface with the web application, independent business processing logic and EDI processes.

Technology: IBM RAD 6.0, J2EE 1.4, Struts 1.2, Hibernate 3.0, Spring Framework 2.0, JSP 2.0, ASP.Net MVC, C#, SQL Server 2008
